---

Ok, so I have a few questions for some projects I'm working on. Prepare cause here they come.

1. How can I remove/change the hitbox that appears when you target someone?
2. In what way is the renegade serial encrypted in the registry? (PM me?)
3. What is in the WOLDAT.key and how is this encrypted? (PM me?)
4. How to remove all the green from the sniper scope when using alpha channels? (every color which is alpha channeled turns out green)
5. Where can I set the position of the menu items and are those W3D's too like the rest of the menu?

Thanks in advance.
