[Units-White Black Green] Apache Attack Helicopter is now up for grabs people.

This was the most unpleasant vehicle to skin hopefully out of all the ones done, and not done.

however, after 7 hour of faffing around, its complete to my satisfaction, and hopefully to yours.

I know many people wanted this one so i put it highest priority, i had intended to do it last but, oh well.

no more talk, screens do talking now.

i Really hope you like this one, you wouldnt believe the amount of things missing from the original file.

plz comment.

I wanted to release it before i went to bed. its now 5:30am

also contains a new sfx for the rotorblades, sounds very baddass.

good morning.

Unit
