Then change some Settings use .INI´s to Modifie it fast, now with same bloom i can play with 10 FPS (on this computer instead of 2)

On my Other Laptop´s Computer´s i can fully play now with 60+ FPS

BTW i tryed you bloom and spent much time in it but never got it work, like i said bloom is not what i want its just a test, the real shader that i want i will post later
