rs4015 wrote on Fri, 27 March 2009 06:30!mao, u think that's bad??? what humans do to animals!!?!?!?!

u should see what they do to other humans first, then u should go give a shit about animals i will always eat meat.

wow, slaughter animals while conscious ...OMG!!!!.ummm. what ur gonna waste money on drugging every single animal!?!?! ya, i dont think so specially since the drugs can stay in the meat and end up in us...the humans

now do u really want us to fall asleep while eating a burger

btw i am against animal cruelty , but there is a difference between cruelty and life, did u ever see how lions kill their preys? is that not cruel?

what about hyenas , they attack from behind and start tearing away at the back (ass area, probably eat the balls first)

is that not cruel

EDIT: oh btw, i forgot to add, the limb movements after the throat slitting is not voluntary, its actually just a bunch of reflexes generated by the spinal cord.(can be seen with headless chickens if u ever saw one jumping around after losing its head)

the brain is deprived of oxygen and quickly loses feeling for anything and cant command its body.

i just watched the rest of it, sick animals must not be classified as ok to eat, thats how mad cow disease started and all the other diseases like it

I can't see how that justifies humans torturing animals.
