here is an Important tip STAY out of the way of your sniping teammats I have lost count of all the head shots i missed cause some person wants to get a shot or 2 off at a harv or the sniper and the bullet hits them instead if your away from the sniper it happends i am talking about the people that go right in front of a sniper no more then 10 steps away.

ALSO the do not PUSH your teammate into fire cause you want to see i have also lost count of times i died cause some one pushes me in to the line of fire of other team/agt/ob

and LAST if you left click while holding the repair gun it damages the person/tank/ect so if someone is rushing your base go after them with the repairgun

if you beleave that last comment you are a n00b
