RenX will have its success. New players with Upper-End-Computers will start with RenX, not Ren.

Players with older systems or people just incidentally got Ren will still start with Ren.

Most of us Ren-addicted will play both, I guess.

I would make my daily/hourly decision by the players ingame: if the teamplayers are in Ren, then I would play Ren. If RenX, then RenX.

Ren will not die.

But: Hurry up to release the TT with the Auto-Map-Downloader.
Gameplay was much more interessting with CP2-Maps running.
And there are so many great maps, e.g. those of ACK and Titan77.

By the way, there is one thing I dont like with RenX: to much splatter effects. I liked the "charme" of Ren...
