Yeah i optimized the Bloom effect on the same Computer that i always use (same PC that i made my old Bloom Video taht lagged)

Now i can still play with 40 FPS and made a Video + Sound + Music (to prove this time that nothing is Photoshoped)

Note: YouTube fucked up the Quality BADLY!.

You have to wait some Hours till YouTube edit this Video with a better Quality!

Here is a Preview of it: YouTube Video.
