Just download it. Put the files in your renegade folder and hit shift+F12

edit the enbseries.cfg

look for...

Quote:[BLOOM]

BloomPowerDay=50

BloomFadeTime=2000

BloomConstantDay=20

BloomQuality=2

BloomScreenLevelDay=60

BloomCurveDay=3

BloomPowerNight=25

BloomConstantNight=5

BloomCurveNight=3

BloomScreenLevelNight=20

BloomAdaptationScreenLevel=80

BloomAdaptationMultiplier=45

BloomAllowOversaturation=3

BloomMaxLimit=70

It does look like crap. It's hardly playable on a 7900GT.

Bloom is supposed to enhance the lighting, not make everything look like you just swallowed a bunch of ex.

its crashed my game, just like Martin says

i just want glowing hud/menu
