I can't go up. :rolleyes:

Pressing crouch send me down just fine, but pressing jump does nothing. So i'm sitting there at ground level getting ripped apart by the guys hovering above me. This may have something to do with the fact that I've revamped my controls a bit:

Crouch = C

Jump = X

Use/Enter/Exit = Spacebar

Could that cause a problem like this?

I'm running the latest patch version, and I've tried this in a few different maps, on different servers, and different aircraft, with no success.

Any help would be appreciated.
