When I open BrenBot no messages are displayed, and the same happens for BRloader. I had BrenBot working for a while and I am not sure how it broke .Can somebody help please.The FDS runs fine, and no I am not intending to run this as a server, as it will obviously fail, I just need to know how to use BrenBot.When i reinstalled BrenBot it still refuses to work.I have configured all the .cfg and .ini files correctly.SSGM and BIATCH seem to be working fine, and I downloaded them with BrenBot.
