matthnatow wrote on Tue, 14 April 2009 17:15I recently formatted my computer and want to reinstall renegade on it. When I start the installation, everything goes fine until 13% installled. Then an error pops up and says "file system error: please insert renegade game disc." I can click retry but it just keeps happening. I dont get it, it installed fine the last time and the disc is not scratched!?!? Whats the deal here?

Matt

It's very possible that your drive is semi-broken and/or dirty.
