Delta XviiRenegade has magnetism, hold on.....

goes into back room, falls into hysterics laughing his ass off, then comes back

Yeah, Renegade has magnetism, sure :rolleyes:

I'm not saying I don't like Renegade or anything, but I dunno. Ya'll make it sound like it is the greatest FPS made(is it really an FPS?)

It just seems that everytime I get that urge play Renegade, I get more and more depressed. There was that one time where I would play it everyday and stuff. But ever since I've played any other game, I just don't feel that compelled.

For some reason, I can feel a Firestorm comin' on.....
Speaking of compelled..... I fell compelled to remind you not to let the door hit you in the ass on the way out!
