i can max download with 40 KB/sec
If i dont have the map it takes 20 min for me to download the map that i dont have lol.

And for that reason i cant play Counterstrike too.
If i want to join a cs server it download the map and if the download are finished the map is over lol and its start to download the next map
Assultcube - works without lag on a 56k modem, and so should still be fine on a 40k connection.
