Goztow wrote on Tue, 21 April 2009 12:38 If we had the auto downloader today, I doubt I'd find more than 15 new maps actually worth putting in our server's rotation.

thats still a decent amount of new competitive maps.

I don't see why you guys don't like the idea of auto banner, if there is a unflawed system which detects cheats, records serial ip and nicks and bans all in a second(a lot faster than a moderator) then that only means the moderator can spend more time playing the game rather than dealing with the 'hes cheating' etc etc complaints.
