Goztow wrote on Thu, 23 April 2009 01:37The main issue is that mysterious FPS lag appears on it for no apparent error. Maybe it's just bad VIS? I seem to remember it happening more often when you fly.

For one player, the FPS will be a steady 59, for another with the same specs it'll be 23. This can change during game, depending on which day you play, ... And most importantly: I don't think it happens on GlacierTS.

i dont have that problem (fps is 300-400 all the time) and this is all problems what this map have? (i really like that map, its perfect for apache/orca whoring low geeks)
