hiya there Whenever I try to get online with Renegade, after I click "Advanced Server Listings" it comes up with a message saying "requesting server listings, please wait", and then goes onto one saying "operation timed out" after a few minutes. It does this no matter what I do with the settings. I have Renguard and the Core Patches and all that shiz installed, I don't have any cheats/mods/skins in my Ren folder, I have a legal copy of Renegade, I've allowed Renegade through my firewall and it still won't let me in. I'm confused as to what to do :S I used to be able to get onto the server listings absolutely fine, haven't played Ren for a few months so only noticed it was stopping me getting on when I loaded it up yesterday after a while. If anyone has any suggestions about what may be wrong and how I could maybe fix it I would be extremely grateful
