- bhs showed up in RED
- gamelog and ssgmlog showed up in ORANGE

- if i activate bhs with "set bhs on", it showed up in GREEN
- if i activate gamelog with "set gamelog on", it showed up in GREEN
- after activation of ssgmlog it still showed up in ORANGE

- irc i got:
"<VWMM_Bot> 04 Warning: The FDS has not responded to the last two status requests, it may have gone offline.", but i'm able use commands for the fds.

- BRenBot shows up like this, BUT BHS.DLL is in RenegadeFDS/Server !!! I'm running Vistax64, Admin Mode.

My Config:

```
# BRenBot configuration file
#
# This is the main configuration file for BRenBot. It is recommended that
# you read the readme file before you start editing this. You should edit
# at least the ircAdminChannel and botName settings.
```

Adds [BR] to the front of all IRC messages. Intended for compatibility
with mirc bots which parse BRenBot messages and expect this to be there.
prefixIRCMessages = 0

Shows team (F3) chat in the public irc channel. Only has an effect if
you use the public channel and teammessages module is enabled.

#-----

Enable auth via "Q" or "NickServ" below. Sample input is shown.
Qauth = 0
Qusername = RenBot01
Qpassword = mypassword

NickServ authorisation. To use NickServ authorisation fill in the Nickservauth
parameter as appropriate. Example: Nickservauth = identify botNickPass
Nickservauth = 0
Nickservname = Nickserv

OPER authorisation, if you dont know what this is don't worry about it.
Fill in the password and user paramaters to enable oper auth.
