Well I think its finished, I hope you will like it I took me some time. I am releasing as a beta because there are still some bugs in it. And maybe there are more of which I don't know.

- There are no bullet holes when you shoot on anything
- I have to change the .tga textures into .dds.
- Change the map name because its a dumb name, only I have no clue how I should name it

Here is a video! I added the sounds afterwards by the way. You won't hear them when you are playing
