Why do you want to launch it through steam?

Its easier for alot of people who have all thier games launch through steam,Instead of having a million shortcuts on your desktop.
Plus theres a chat you can use ingame,and can start groups and shit with chat rooms.
easier to find cws with I think.

I'll take a look at it (and probably fix it)

woot thanks,that would be great.
yeah but it eats your cpu you should just go get xfire
