Shouldn't this poll be called 'Which non-handheld current generation console(s) do you have' since it doesn't include any handheld or previous generation consoles.

Anyway...

Handheld;
Game Gear
GameBoy
GameBoy Pocket
GameBoy Advance
Playstation Portable

TV;
Mega Drive II
Playstation
Playstation 2
Wii

I was never a big fan of consoles really, most of the decent games for them are also released on PC in an improved format, and the ones which are not have never really interested me that much. Long live PC gaming
