This only works with the Covert Operations installed.

For those of you running Windows 95-00, go to the MS-DOS prompt. For those of us not living in the past millenium, in XP go Start > Run > cmd.

Navigate to the C&C95 directory via "cd directory," "dir," and "cd.."

If you can't figure it out, then go buy a DOS manual, you n00bs.

Once navigated to the C&C 95 directory, usually C:\Westwood\C&C95\, run the executable by typing "C&C95.exe funpark" without the quotes. When you're in the game, just start a new one, and it will automatically load to Kane polishing his gun.
