can you honestly tell me you're going to play a lot more renegade after this patch is released? if
no then maybe you shouldn't talk and you should let the people it will actually affect worry about it

I plan on playing significantly more than I do now once it's released. I agree with Chuck Norris,
100%. It was unintended, so it's broken. Fix what is broken.

alright, have fun

i'll play against you in a reneperfect server someday if you're serious

there are only a few servers where playing well would make you do well on the ladder, and as of
now all of them would have to make changes to the current gameplay just so they could be on the
ladder TT is making

good luck with that
