crysis992 and me wanted to make a whole ren skin pack for the tt patch.  
The theme of the skin pack was  
nod to scrin from cnc3  
and gdi to tiberium monsters  
the idea was good and some big parts were finished  
but the motivation was gone so we decided to make another skin pack.  
The theme now: A path Beyond.  
we started today so just 2 vehicles  
but we decided to release the GDI characters.  
Here are some screenshots of the chars.
