It's A.I.D.S! Not A.I.D's!

The 'S' is part of the acronym too! It stands for 'Syndrome.'

Billions of people have died from this disease and you can't even spell its name correctly! FOR SHAME!

Yeah I stopped caring about correctly spelling the name of that blood infection when it became clear to me that I'll never be a doctor, know what I mean?

and Snipe, A.I.D's ('A.I.D.S' for that smart ass) and H.I.V are blood infections, specifically a white blood cell infection, though it can be transmitted through blood, breast milk, vaginal fluid and semen, can't be transmitted through kissing, or getting a blow job, unless she bites her tongue or lip before sucking you off, in which case, your fucked.
