26 Americans have died from the swine flu "outbreaks"? Dangerous!

# 257 people died from influenza each year in the US 2001 (Deaths: Final data for 2001, NCHS, CDC)

# 0.1 people per 100,000 population died from influenza each year in the US 2001 (Deaths: Final data for 2001, NCHS, CDC)

Hooray for irrational fears brought on by the annoyingly idiotic media!
