im not really into models (even tho im a modeller LOL) for ren,

adding stuff is just a hinderance, they cant see it you can walk through it, you cant see through it, if they plant a nuke/ion inside a piece of fake geometry your not gonna be able to disarm it because you wont know where it is :/

if im talking crap then just stop me there,

but i believe in just changing colours is more than enough if done right, not physical appearance.
