well I am old time Renegade, I used to have everything Installed Perfectly but after playing WOW for 4 years I Decided to Return to Renegade.

But this time it's not Perfect

anyways I installed the game, then the full patch, then Renguard and Finally CP1 everything started Great untill i got this??

Failed : 404 Not Found

check network connections, close the programe and try again.

thing is all connections are Great i have given full Allow for Renegade game.exe and game2.exe on my Firewall.

for now I Turned off cp1 in Reguard Options.

I thought Maybe the Firewall Was Preventing CP1 itself except theres nothing to allow or Disallow as of yet so any help would be Great thankyou.

Blackhand Studios Core Patch Down...

From the Creators of RenGuard, Blackhand Studios(tm) proudly presents "Core Patch Two". CP2 is the latest in a string of unofficial C&C Renegade updates which fix several bugs identified in the game and add new, exciting features and the very best in fan-made maps.

Four excellent maps, C&C_BunkersTS, C&C_Last_Stand, C&C_Terrace, and C&C_Tropics are all available through this update. We encourage all players to try out these new maps.

General Features:

- The faster map loading enjoyed with Core Patch 1 has been made even faster in this patch.
- Version 2.2.1 of the custom scripts.dll by "jonwil"
- The font change inadvertently introduced, and the custom loadscreen in CP1 has been revoked, restoring the Renegade defaults.
