Hi,

in Level Editor (jonwil), whenever I go the the option Edit / Level Settings , the tool seems to ctd.
Any ideas as to why this happens?

Thanks in advance

Edit: ok, never mind, i found out why (well not why, but how to solve): rightclick
leveledit/properties-->disable visual theme's.

Rawr, I must still be sleeping

Typical saturday morning question, you'll have to forgive me.

Regards
