Ok that fixes that problem but why is it saying:

1>.\shaders.cpp(37): fatal error C1189: #error:

The Renegade shaders.dll requires the DirectX August 2006 SDK installed in order to produce a proper executable.

If you wish to use a different version of the SDK, modify the delay load dll in linker settings to point to the newer d3dx.dll

I have

already set before it shows that error.
