Sorry for causing these guys to de-rail ur topic dover

The Exif data supports that you used Photoshop CS to make the image, but I have to ask why you didn't just copy your regular Renegade shortcut and rename it. That would've been easier. And it were really a joke, why didn't you make it obvious (Ah-la Ethenal)? Not saying I'm convinced you cheat, but if that was supposed to be funny it wasn't very good. There's also the shortcut to your data folder, I'm not sure what kind of use the standard non-cheating Renegade player sees there...
