---

i remember doing a nice rush some time ago on under.  
I was a mobius had a repair gun and a mine on me (so i could repair myself) there was a havoc and a hottie with me. We ran from the pp side tun to the hon. The hottie go killed and i got damaged by the ob. We (I and the havoc) got inside hon and i planted a ped ion, we were planning to double ped but the havoc got killed by ob threw the window, but i placed the ped ion. We were lucky that they were whoring the field and the entrance to our base so there was a tech in hon only who attacked me. 2 Remotes and i almost died but repaired myself a bit by using the mine so i could kill the tech and the ion detonated. and we won nod was winning then by keeping us pinned down in base.
