i was hoping to see the whole map reskinned but ah well
but it has cactuses

yes caxtuses they own your face if you touch them. Any skin themes that you would like to see for canyon or city flying.

That fallout theme for City_Fly that ErroR [I think] did was pretty cool. Maybe somehow make that into one of the other maps? Or some sort of theme like it. Broken down city of some sort.

Being more original, ehh could try a tropical sort of them for canyon.
