i think everyone really needs to know, that i have TFD and i have modded before so i know where the data directories for the games are

but i haven't modded renegade only generals and zero hour, but even so i know where the data directories are and i have had winrar since september of last year

thank you for helping

and also i do have a problem, i downloaded a flamer skin and put it in the data directory but it didn't change how the flame tank looked

was it because it was in .dds skin format?

EDIT: btw it was JsxKeule flamer skin
