huhnu wrote on Tue, 16 June 2009 18:57also i do have a problem, i downloaded a flamer skin and put it in the data directory but it didn't change how the flame tank looked

was it because it was in .dds skin format?

EDIT: btw it was JsxKeule flamer skin

If it doesn't work then you didn't put it in your renegade data folder. Double check it, i'm sure it ended up somewhere else.
