That's XP. SP2, I think.

What I did was take all the icons off my desktop and hide the taskbar. Then, I run ObjectDock (Although I hear RocketDock works fine too) and RainMeter (Which is the clock/system-usage/winamp control).

I installed rocketdock actually. the only thing i don't like about it is that it doesn't "stop" other windows. For example it might be always ontop, however the bottom of windows (like the status bar) goes directly to the bottom. I would rather have the vista sidebar effect where it "cuts off" that part of your screen so full sized windows dont go past it (like the standard windows toolbar)
