ok hey guys i got scripts running after finnaly finding a tutorial and so i thought well thats easy so im gonna download the ubermappack. when it downloaded i put it in the sme folder as my scripts (not the data file) and thought it would work. However when i went to start the game ii heard the sound from the intro but couldnt see any images. I have a black screen the instant i hit play and am not able to play.I also cant just delete it cause i dont know what the ubermackpack's file is called. (i have the first decade version and 3.4.4 scripts) any help would be great thnx
