as i said im new and this basic stuff is all i know so far but im just guessing it but here cnc

```
#include "stdafx.h"
#include <iostream>
using namespace std;

int main() {
    double a, b, c, d, e;
    cout << "Enter numbers here to be added up (5 is the max) then multiplied by 100 ";
        cin >> a;
    cout << "Enter second digits: ";
        cin >> b;
    cout << "Enter third digits: ";
        cin >> c;
    cout << "Enter fourth digits ";
        cin >> d;
    cout << "Enter fifth digits: ";
        cin >> e;
        cout << "The Output Is: " << 100 * a + b + c + d + e;
    return 0;
}
```
