I think when something is affecting you it seems like ages. But real progress is being made.

For obvious reasons I cannot say exactly what has been discovered about the exploits, however right now I have been trying to get hold of some of the people at EA. Right now a lot of the them are moving to LA and are busy with various projects. I have emailed quite a few people there for some help. Rest assured though people in the community are still working hard on this.
