---

I recently bought a new gaming mouse, and I'm wondering if there is any way to assign the extra buttons on the mouse in Renegade. I can't assign it through in-game options, and I don't exactly know what I should put in through keyconfig for 4th and 5th mouse button identifier. Anyone know anything about this or is it even possible?

Sorry if its been asked before, I used search and it didn't show anything :/ or I'm just retarded when it comes to search
