Too true, everytime I go to C&C_Field, I see three artilleries and one light tank. All three of 'em are sitting on the front lines, just outta range of the base defenses around the corner. Its stupid, and the same goes for the MRLS as well.

Patch is good for close quarters combat, especially if you don't want to get tiberium poisoning. Use him to take out basic soldiers, like engineers, and if you want something to rival SBH attacks.
