thx... but i just converted it to a gif file and had to decrease the image quality to reduse the size. the animated gif file at same quality was 900kb so i decreased the quality and now its 225kb. so than i uploaded it on noobstories.

and here it is.

P.S. i done know why but it slowed the speed of the fps down after i uploaded it. so im not really sure what the problem. and the detail will sux a little.
