resistor1 wrote on Fri, 07 August 2009 11:30k well the card gave me about 160-170 fps on renegade and it was only 75 dollars, can play in high resolutions with good resolutions. Runs left 4 dead great at 100+ fps high settings in 1024x768 resolution, havent tested others. I have 300w power supply and this card works great so if u have a bad poewr supply and want a good card tihs is ur card

Which card brand did you get?

Do you know the make of your PSU?

And god damn your lucky to have such high FPS.
