That didnt give any advantage! But you and APB team think that a huge problem. HA! and HA! again.

I leave APB team because they do shitty things and dont want to see around, they dont want to hear community opinion. Like EA...

anyway your anticheat cant block this HUD for now... and when Scripts4 will be released APB and Renegade will be already dead and no one will want to play it online. cuz Renegade-X and other cool games.

Are you related to Scrin?
