When I click on the C&C The First Decade Icon it says I can launch it but the main menu doesn't show up...In my processes it says the TFDLauncher is running but my desktop stays blank. When I go to uninstall the program I get a pop-up dialog message saying.

Setup.exe

Setup.exe has encountered a problem and needs to close. We are sorry for the inconvenience.

Close

My uncle did a system restore to about a month ago to where the game was installed and I came home and it started doing this. I undid the restore point yet it appears nothing changed as a result. Any help would be appreciated thanks.
