ok heres my prolbem i have two hard drives one with xp home edition witch renegade runs fine on and the other has xp pro it is on xp pro that i am having the prolbem renegade will load all the way up to renguard when i click on renegade to launch the game the screen goes black then goes striate back to the settings for the game when i click ok from there it goes back to renguard and will contune this cycle over and over again

i use both hdd on the same system and i only use the on bord video i have no video card 2 gig of ram 2.66 ghz dual core processor over clocked to 3.1 to switch between the hdd i have to open the case and move the power cord i haven't bout a Y yet

any help on getting renegade to work on xp pro would be great thanks
