Zack wrote on Fri, 28 August 2009 20:19The name used in the said screenshots is "DELL" which means it could be anyone. Also note the player count is 1 which means it's a LAN game. "DELL" could be anyone as it's the name of a computer manufacturer and the default computer name (I think? haven't owned a dell machine in ages) so...

It's not solid evidence that it is in fact queenhunter cheating.

But I guess you guys are stubborn and won't see any other side to a story anyway. No use arguing with idiots who are one-sided in an issue.

Like I said, read the posts...

This is not me sticking up for him it is my observation of him over the past 6 months while in game playing along side of him.

rebdog wrote on Sun, 12 April 2009 16:56ok i think this is complete bullshit, so what he used *cheat name removed*while taking some screenshots.

Like 75% of you havnt tried it on multilayer practice, just to see what it can do. 6 months or so ago i got my mate to join a server which i made with a password, so i could see what it does to learn from it. From learning what it does ive caught alot of people using it. I even tried using DH hacks on my own server to test if biatch was working. I dont see the big deal tbh. Do half you which are mods ban for evidence on other servers, no you dont. So go ban me too

agreed, ive played with queen for 5months+ on several different servers, never seen or suspected anything suspicious and have had no complaints reported to me about queen by any ingame player, so what he appears to have *cheat name removed*on his computer tell me you dont, WHERE'S YOUR INGAME ONLINE PROOF, ill tell you were it is you dont fucking have any, good to see queens mistake has given you idiots something to talk about, but there's no way using *cheat name removed*on a private lan game is a bannable offense for online servers, do some real detective work find him cheating ingame of shut the fuck up

Seriously,

If you are running *cheat name removed* in a LAN game to take screenshots (with no1 else in it), it means you are utterly retarded, OR you run it everytime when starting up Ren (habit), OR you used *cheat name removed* in a public game, then switched over to a LAN game without quitting Ren.

Now give me VALID reason why you need to run *cheat name removed* in a LAN game, WITHOUT any other players. WITHOUT any others players, it has NO use testing a cheat.

This proof is enough proof to conclude him as a cheater.

@Nz,

Cheaters can also play smart while running cheating. The ppl who obviously use cheats will often get banned, but there are also ppl who safely use cheats, without getting banned.

Gozy, this "DELL" is most probably the computer name that loads up during LAN play IF you choose not to type in a custom nick while setting up the game.

My computer's name is "ULTRA". Whenever I want to play a singleplayer LAN game (to test skins) and click on Multiplayer LAN in the main menu, the next screen shows the field to enter in a custom nick. Unless you have changed it before, this field has the computer name by default and for me it is always ULTRA. It is always in caps.

That could be the case here.

EDIT: DutchNeon already mentioned this in the first page:
