Shall I get out my tin-foil hat? Any minute now we'll be hearing from the "we never went to the moon" crowd that think the gub'mint used missiles and C4 that were somehow altered to look like commercial airliners and jet fuel explosions instead. Oh, and we mustn't forget how they evacuated all the jews from the towers, or how nobody *really* died at the Pentagon (they're at Area 51 with the alien bodies and the mind control rays).

Or we could wait a few more days, have a moment of silence, and get on with our lives.
