Due to the summer correction thing, I'd like to confirm this is UK time.

I thought british summer time was the correct time (i live in england!), i thought daylight savings time (i.e our clocks go back an hour)was introduced so in winter during war time farmers and workers had an extra hour of daylight. anyways regardless Time in GMT when i posted this message is 4:09pm (taken from my pc clock). hope thats of help to ya'll.
