nikki6ixx wrote on Tue, 08 September 2009 23:10 Intel released their new P55/Socket 1156 lines, and it looks like they'll be the sweet spot if you're just looking for great gaming performance, and don't care about how fast you render videos, or whatever. It's also much cheaper, so you'll wanna look into prebuilt system's that have Core i5 750's or i7 860's.
Seconded. i5 would be perfect unless you're looking for tri/quad sli/cross fire and need the extra pci-e bandwidth.
