Sigh.

Havoc is right.

APB Gamma and cnc_reborn will both be using 4.0, so TT has to finish first!

Is 4.0 coming out exclusively with TT? What if 4.0 gets finished before the patch is ready, would they need to be released together?

If so, then yes, TT must come out before Reborn, unless Reborn decides it does not need 4.0 for their projected release.

TT and 4.0 basically have the same relationship as scripts.dll and bhs.dll. This also means that they will be released together, and can't be mixed n matched with different versions.
